

Authorization Number 13 819 N Inducoat Anti-Bacterial Coating

ctgb

Board for the Authorisation of Plant Protection Products and Biocides

Inducoat Anti-Bacterial Coating / 13 819 N

Biocidal products are all substances or mixtures consisting of, containing or generating one or more active substances with the intention of destroying, deterring, rendering harmless, preventing the action of, or otherwise exerting a controlling effect on harmful or undesired organisms. In the Netherlands, biocidal products can be used or traded only if they have been authorized. To this end, the Ctgb evaluates biocidal products regarding their effects and risks, focusing specifically on the following:

- efficacy
- environmental effects
- effects on humans
- physicochemical properties

To conduct the assessment, the Ctgb uses an assessment framework. This is the collective name for laws and regulations, national and international policies and guidance documents with scientific content.

Inducoat Bacteria is the only coating which fully complies to these standard and therefore is the only coating to be allowed to make the anti-bacterial claim in The Netherlands since 2010.

This authorization can be derived from the unique authorization number which is granted to Inducoat B.V.:

13 819 N

Amersfoort, The Netherlands, 2017
